

## Sequoia ePOS

*ePOS from Sequoia Retail Systems allows retail stores, student activities, and other campus locations to design and maintain an online storefront. Bring convenience to your campus community and beyond with a complete website provided through Sequoia's hosted services.*

- Maintain your brand and independence through a store website
- Reduce overhead costs by way of hosted services
- Sell with confidence via PCI certified check out
- Better serve your campus community by accepting credit cards, campus cards, financial aid, and gift cards
- Extend your market to web-enabled mobile devices
- Simplify special event orders by capturing data through custom forms
- Ensure events are not oversold through item limits
- Minimize support costs by managing web content via an easy-to-use content administrator

### ***Hosted Solution***

- Automatic detection of mobile devices and optimized templates for complete mobile commerce
- Low start-up costs with no on-campus infrastructure
- PCI compliant off-site credit processing
- Quick and easy setup through template-based designs
- Campus branding through consistent colors and page layouts
- Performance balancing during busy periods
- Interface with UPS and FedEx shipping software

### ***PCI Compliant***

- No bank card information stored on campus
- Credit cards, campus cards, financial aid, and gift cards accepted as payment
- Address verification for bank card payments
- Real-time capture of sales to store reports

### ***Content Administrator***

- Create and publish on-line merchandise catalogs
- Add or edit items and images to publish on your website
- Manage web page content to include featured items and links
- Maintain tax and shipping tables
- Incorporate custom forms, events registration, and donations
- Manage customer email delivery and content
- Edit invoice and packing list formats
- Create and run web commerce reports
- Accept phone or mail orders
- Review and process all web orders

### ***Sequoia Services***

- Customized websites
- Store or event specific form creation
- Integration with third party web tools
- Custom report creation
