

Major Features of FashionManager™ EDI:

- UPC Management
- Integrated with FashionManager™ ERP
- Transmit UPC's to the Catalogue
- Cash Update with 820 Interface
- Factor Interfacing
- Send Receive Auditing
- 852 Retail Analysis
- Standard VIC documents
- UCC 128 compliant
- 753-754
- Email Alerts
- Auto Reduction of Bulk Orders with EDI Confirmations
- 860 Automatic Order Changes
- Eliminate Need for a 3rd Party Translator

FASHION MANAGER

The FashionManager™ Electronic Data Interchange Translator (EDI) connects you electronically with your retail trading partners. As a fully integrated component of the FashionManager™ ERP system, **FashionManager™ EDI** delivers major cost savings by eliminating the need for third-party EDI services and related waste and errors due to double entry.

EDI transactions are available to sales and production immediately upon receipt. Receive 850 order transmissions from retailers into FashionManager™ ERP and immediately generate reports. Send out 856 ASN and 810 invoices automatically upon shipping goods through the FashionManager™ WHAMS warehousing system. Dispute chargebacks by querying FashionManager™ ERP to verify what cartons, styles, colors and sizes shipped on the ASN.

FashionManager™ EDI helps you eliminate unnecessary chargebacks, increases operational efficiencies, and turns wasteful spending into increased margins.

FashionManager™ EDI is fully integrated with the RLM FashionManager™ suite and is available in either affordable On-Premise licensing or Cloud-Based subscription with low startup costs.

The screenshot displays the FashionManager™ EDI software interface. It features several key modules:

- Style Manager:** A window for managing styles, including search criteria, advanced search, and query status options.
- UPC Inquiry:** A window for querying UPC information, showing a table of style details.
- Sales Order Manager:** A window for creating, modifying, or inquiring sales orders, including filter criteria and a detailed order list table.
